Know Better, Do Better

Teaching the Foundations So Every Child Can Read

Meredith and David Liben have spent decades transforming education, working as teachers, researchers, leaders, and founders of an alternative public elementary school in Harlem—the Family Academy. The Libens have been on the front lines of the reading wars since 1994, when the Family Academy's first cohort of students failed the NYC end of year reading exam and they were confronted with the question: How can a school with plenty of resources, dedication to outstanding instruction, and support for social and emotional learning fail so spectacularly at teaching children how to read? The answers are collected here in *Know Better, Do Better: Teaching the Foundations So Every Child Can Read*. The Libens have poured through the research, pedagogical movements, and deeply entrenched classroom myths to find the literacy practices and instructional materials that actually improve student learning outcomes. Through their work, the Family Academy reading scores rose to the highest of any non-"gifted" school in Harlem. The best of intentions aren't enough to make children literate; educators have to know better so they can do better.

Reading Acquisition *Routledge*

Originally published in 1992. This book brings together the work of a number of distinguished international researchers engaged in basic research on beginning reading. Individual chapters address various processes and problems in learning to read - including how acquisition gets underway, the contribution of story listening experiences, what is involved in learning

to read words, and how readers represent information about written words in memory. In addition, the chapter contributors consider how phonological, onset-rime, and syntactic awareness contribute to reading acquisition, how learning to spell is involved, how reading ability can be explained as a combination of decoding skill plus listening comprehension skill, and what causes reading difficulties and how to study these causes.

How to Read Like a Writer *The Saylor Foundation*

When you Read Like a Writer (RLW) you work to identify some of the choices the author made so that you can better understand how such choices might arise in your own writing. The idea is to carefully examine the things you read, looking at the writerly techniques in the text in order to decide if you might want to adopt similar (or the same) techniques in your writing. You are reading to learn about writing. Instead of reading for content or to better understand the ideas in the writing (which you will automatically do to some degree anyway), you are trying to understand how the piece of writing was put together by the author and what you can learn about writing by reading a particular text. As you read in this way, you think about how the choices the author made and the techniques that he/she used are influencing your own responses as a reader. What is it about the way this text is written that makes you feel and respond the way you do?
