A three-phase motor must be wired based on the diagram on the faceplate. The first step is to figure out the voltage of your phases. In the United States, for low voltage motors (below 600v), you can expect either 230v or 460v. That being said, there is a wide range of different motors and what you have on hand

can be completely different. Make sure that the voltage you will be supplying to your motor matches the specifications on the faceplate.
