Chapter 2 (Chemistry, matter, and life) Flashcards | Quizlet

Physical properties are characteristics that describe matter. They include characteristics such as size, shape, color, and mass. These characteristics can be observed or measured without changing the identity of the matter in question. Chemical properties are characteristics that describe how matter changes its chemical structure or composition. An example of a chemical property is flammability—a material's ability to burn—because burning (also known as combustion) changes the chemical ...

1.2: The Classification of Matter - Chemistry LibreTexts

The state of matter that shows the uniformity of behavior : (a) Solid Liquid (b) Liquid (c) Gas (d) None of the Above. Answer. Answer: (c) Gas Explanation: Of the three states of matter, the gaseous state is the simplest and shows greatest uniformity in behaviour. Gases show almost similar behaviour irrespective of their chemical nature.
