Interior Design Clients *Simon and Schuster*

Clients are the lifeblood of any interior design firm and a sound understanding of how to manage those clients is essential. Interior Design Clients is an informative yet fun read for entrepreneurial designers interested in gaining a better understanding of how to build and manage their clientele. Tom Williams, designer, author, and blogger, deconstructs the pitfalls and challenges that can waylay even seasoned designers. As many professional designers learn, clients can be intimidated by interior designers and sometimes can even be fearful of the process. This unreasonable intimidation can often hinder the designer-client relationship and can even stop clients from asking for what they want. This leads to clients being unsatisfied and then walking away with a negative impression of their designer. Learning why clients fear their interior designer and developing strategies to allay those fears is essential for gaining and keeping a satisfied clientele. Everything from good client, project, and time management to interview techniques and staff and paperwork organization can all lead to making client interaction as rewarding as possible and are important aspects of the business rarely addressed by the interior design community as a whole. Interior Design Clients covers the subjects rarely taught in design schools such as specific presentation and interview skills and how to sell to market. Through frank discussion and practical examples, Williams weaves the art of selling into his lessons on interviewing, presenting, and pleasing the client as a natural part of the design process. Becoming a residential or commercial interior designer is not an easy undertaking, but Thomas Williams' Interior Design Clients: The Designer's Guide to Building and Keeping a Great Clientele provides the fundamental lessons and innovative solutions to help designers succeed in the ultra-competitive world of modern interior design. Human Dimension and Interior Space *Watson-Guptill*

The study of human body measurements on a comparative basis is known as anthropometrics. Its applicability to the design process is seen in the physical fit, or interface, between the human body and the various components of interior space. Human Dimension and Interior Space is the first major anthropometrically based reference book of design standards for use by all those involved with the physical planning and detailing of interiors, including interior designers, architects, furniture designers, builders, industrial designers, and students of design. The use of anthropometric data, although no substitute for good design or sound professional judgment should be viewed as one of the many tools required in the design process. This comprehensive overview of anthropometrics consists of three parts. The first part deals with the theory and application of anthropometrics and includes a special section dealing with physically disabled and elderly people. It provides the designer with the fundamentals of anthropometrics and a basic understanding of how interior design standards are established. The second part contains easy-to-read, illustrated anthropometric tables, which provide the most current data available on human body size, organized by age and percentile groupings. Also included is data relative to the range of joint motion and body sizes of children. The third part contains hundreds of dimensioned drawings, illustrating in plan and section the proper anthropometrically based relationship between user and space. The types of spaces range from residential and commercial to recreational and institutional, and all dimensions include metric conversions. In the Epilogue, the authors challenge the interior design profession, the building industry, and the furniture manufacturer to seriously explore the problem of adjustability in design. They expose the fallacy of designing to accommodate the so-called average man, who, in fact, does not exist. Using government data, including studies prepared by Dr. Howard Stoudt, Dr. Albert Damon, and Dr. Ross McFarland, formerly of the Harvard School of Public Health, and Jean Roberts of the U.S. Public Health Service, Panero and Zelnik have devised a system of interior design reference standards, easily understood through a series of charts and situation drawings. With Human Dimension and Interior Space, these standards are now accessible to all designers of interior environments.

Interior Design Masters *Routledge*

Interior Design Masters contains 300 biographical entries of people who have significantly impacted design. They are the people, historical and contemporary, that students and practitioners should know. Coverage starts in the late Renaissance, with a focus on the twentieth and twenty-first centuries. The book has five sections, with the entries alphabetical in each, so it can serve as a history textbook and a reference guide. The seventeenth- and eighteenth-century section covers figures from Thomas Chippendale to Horace Walpole. The nineteenth-century section includes William Morris and Candace Wheeler. The early twentieth-century section presents modernism's design heroes, including Marcel Breuer, Eileen Gray, and Gilbert Rohde. The post-World War II designers range from Madeleine Castaing to Raymond Loewy. The final contemporary section includes Ron Arad and the Bouroullec brothers. These are the canonical figures who belong to any design history. The book also contains less well-known figures who deserve attention, such as Betty Joel, the British art deco furniture designer; Paul Veyseyre, the Frenchman active in China in the 1930s; and more recently Lanzavecchia-Wai, the Italian-Singaporean duo whose work ranges from health care to helicopters. Global in its coverage, the book is richly illustrated with over 600 black-and-white and color photographs.

This book sets out design principles for all the essential components of successful housing design – including placemaking, typologies and density, internal and external space, privacy, security, tenure, and community engagement – illustrated with case studies of schemes by architecture practices working across the UK and continental Europe. Written by David Levitt and Jo McCafferty – two recognised authorities in the field – and with contributions from more than twenty other leading practitioners, The Housing Design Handbook is an essential reference for professionals and students in architecture and design as well as for government bodies, housing associations and other agencies involved in housing.
