traditional C programming and embedded C. Chapter4 deals with the programming of on-chip resources of MCS-51 family microcontrollers in C. The theoretical details of these on-chip resources such as ports, timers, etc., are completely eliminated. As the book aims at hands-on approach, the programs for the on-chip resources have been developed

EXPLORING C FOR MICROCONTROLLERS

C++ templates are a useful facility in these situations. When we use C++ function templates, only one function "signature" needs to be created. The C++ compiler will automatically generate the required functions for handling the individual data types. This makes programming much easier - Here is an example:
