 When the original Honda Rebel hit the streets back in 1985, it was a 250cc mini-Harley-lookalike cruiser, finished in chrome, and aimed squarely at the US market. It was briefly joined in 1986-87 by a 450cc version as Honda tried to muscle in to a younger

customer base.

Honda's new CMX500 Rebel is the blackest, most bad-ass-est A2-compliant bike you can buy. Powered by Honda's well-proven

and much admired 471cc parallel twin motor, in an all-new bobber-style lowrider chassis that gives confidence to new riders and those with shorter legs, while not being too cramped for cider-bellied six footers either.

Honda CMX500 Rebel review (2017) | UK road test

Twin-cylinder engines are a great choice for a machine like the Rebel 500. Honda twins are famous for their versatility, and the 471cc Rebel 500's engine is one of our best ever. The parallel-twin engine is narrow, which helps reduce overall bike size. Plus it offers lots of low-rpm torque, but plenty of higher-rpm performance.
