Telomere Secrets

The shorter the telomere, the less gene activity you have. When you were young your telomeres were long. As you age, and your cells divide, all your telomeres shorten, except for reproductive cells. If they shortened, we would be born quite old after just a few generations. A special enzyme called telomerase can restore telomeres.

Most cells can replicate approximately 50 times before the telomeres become too short. Some researchers believe that telomeres are the supposed "secret to longevity" and that there are circumstances in which telomeres will not shorten. For example, cancer cells don't die (which is the main problem) because they activate an enzyme called telomerase that adds on to the telomeres when cells divide.
