2017). Building Information Modelling (BIM) and Geographic Information System (GIS) are conventional representations of these systems. Both fields have been developed for addressing respective problem domains. However, with technological advancements and user specifications, they have advanced, in-dividually, with overlapping features.

AUTOMATIC ONTOLOGY GENERATION OF BIM AND GIS DATA

GIS and BIM evolved as information

technologies that serve distinctly separate parts of the life cycle of the organizations that operate and build infrastructure and communities. Those organizations strive to remain within budget while achieving desired results.

GIS and BIM Integration Leads to Smart Communities

Integrating GIS technology with BIM becomes more complex than just reading graphics and attributes from a 3D model and showing them in GIS. To really understand how information can be used across BIM and GIS, we often find that we have to redefine our concept of a building or a roadway and to understand how

GIS and BIM Integration: Common

Myths and Practical Outcomes

Once collected, management and application of these data often use technologies such as Building Information Modeling (BIM) and Geographic Information System (GIS). BIM can be used to create, manage and share the lifecycle data of vertical facilities such as buildings while GIS can be used to store, manage and analyze data describing the urban environment, which is horizontally distributed.
