Hypertonic - Isotonic and Hypotonic Solution = Simple Explanation Via Animation (HINDI)

Definition Of Hypotonic Solution

A hypotonic solution is a solution that has a lower solute concentration compared to another solution. A solution cannot be hypotonic, isotonic or hypertonic without a solution for comparison. Hypotonic is a description of the solute content of one solution in relation to another solution. It is used in biology to help scientist describe cells.

Hypotonic Solution - Definition & Examples | Biology ...

hypotonic solution A solution having an osmotic pressure less than that of cells or body fluids; a solution that will cause water to enter cells, thus inducing swelling and possibly lysis.

Hypotonic solution | definition of hypotonic solution by ...

Hypotonic solution: A solution that contains fewer dissolved particles (such as salt and other electrolytes) than is found in normal cells and blood. Hypotonic solutions are commonly used to give fluids intravenously to hospitalized patients in order to treat or avoid dehydration.

Definition of Hypotonic solution

A hypotonic solution means something that has a lower solute concentration in comparison to another solution. A solution is not hypotonic, isotonic or hypertonic if there is no solution for comparison. It helps scientists to describe cells.

Hypotonic Solution - Definition and Examples, Types

A hypotonic solution refers to when one solution has less solute than another. This situation causes water to travel across a semipermeable membrane in order to try to dilute the concentrated...

Hypotonic Solution: Definition, Example & Diagram - Video ...

1. (Pathology) (of muscles) lacking normal tone or tension 2. (Chemistry) (of a solution) having a lower osmotic pressure than that of a specified, generally physiological, solution.

Hypotonic solution - definition of Hypotonic solution by ...

A hypertonic solution is one which has a higher solute concentration than another solution. An example of a hypertonic solution is the interior of a red blood cell compared with the solute

concentration of fresh water.

What Is a Hypertonic Solution?

A hypotonic solution is a solution that contains less solute than the cell which is placed in it. If a cell with a NaCl concentration is placed in a solution of distilled water, which is pure water with no dissolved substances it, the solution on the outside of the cell is 100% water and 0% NaCl.

Isotonic, Hypertonic, and Hypotonic Solutions

Hypertonic Solution Definition. A hypertonic solution contains a higher concentration of solutes compared to another solution. The opposite solution with a lower concentration is known as the hypotonic solution.Scientists must describe cell contents compared to the environment. If a cell is placed in a hypertonic solution, the cell is considered hypotonic.

Hypertonic Solution - Definition and Examples | Biology ...

Hypotonic Solution. A hypotonic solution has a lower solute concentration than inside the cell (the prefix hypo is Latin for under or below). The difference in concentration between the compartments causes water to enter the cell. Plant cells can tolerate this situation better than animal cells.

Isotonic vs. Hypotonic vs. Hypertonic Solution | Biology

Hypotonic is a descriptive word relating to hypotonicity. In cellular level, hypotonicity may pertain to a property of a solution with a comparatively lower concentration of solute s relative to the amount of solutes in another solution.

Hypotonic Definition and Examples - Biology Online Dictionary

hypotonic in British English. (ˌhaɪpəˈtɒnɪk) adjective. 1. (of muscles) lacking normal tone or tension. 2. (of a solution) having a lower osmotic pressure than that of a specified, generally physiological,

solution. Compare hypertonic, isotonic.

Hypotonic definition and meaning | Collins English Dictionary

A hypotonic solution is one in which the concentration of solutes is greater inside the cell than outside of it, and a hypertonic solution is one where the concentration of solutes is greater...

Hypertonic Solution: Definition, Effect & Example - Video ...

Hypotonic solutions are the complete opposite of hypertonic solutions. Cells often have a water concentration that is lower than outside of the cell. Following this, the solutes outside of the cell are less than the solutes within the cell.

Understanding Hypotonic, Hypertonic, and Isotonic Solutions

Hypotonic definition is - having deficient tone or tension. How to use hypotonic in a sentence.

Hypotonic | Definition of Hypotonic by Merriam-Webster

In an isotonic solution— iso means the same—the extracellular fluid has the same osmolarity as the cell, and there will be no net movement of water into or out of the cell. Hypotonic, hypertonic, and isotonic are relative terms. That is, they describe how one solution compares to another in terms of osmolarity.

Tonicity: hypertonic, isotonic & hypotonic solutions ...

1. (Pathology) (of muscles) lacking normal tone or tension 2. (Chemistry) (of a solution) having a lower osmotic pressure than that of a specified, generally physiological, solution.

Hypotonic - definition of hypotonic by The Free Dictionary

A hypotonic solution has a lower concentration of solutes than another solution. In biology, a solution outside of a cell is called hypotonic if it has a lower concentration of solutes relative to the cytosol. Due to osmotic pressure, water diffuses into the cell, and the cell often appears turgid, or bloated.
