Water power engine - Wikipedia

Their Water Energy System (WES) appears to be nothing more than a fuel cell converting the hydrogen and oxygen back into electricity, which is used to run to a motor that drives the wheels.

The Truth About Water-Powered Cars: Mechanic's Diary

A water-fuelled car is an automobile that hypothetically derives its energy directly from water. Water-fuelled cars have been the subject of numerous international patents,

newspaper and popular science magazine articles, local television news coverage, and websites. The claims for these devices have been found to be pseudoscience and some were found to be tied to investment frauds. These vehicles may be claimed to produce fuel from water on board with no other energy input, or may be a hybrid c

Water-fuelled car - Wikipedia

An engine powered by water would wipe out a large chunk of the fossil fuel industry and change the way these companies do business all together. The oil and gas corporations combine to bring in trillions of dollars every year. Inventions like these are a direct threat to the industry.
