A systems analyst, also known as business technology analyst, is an information technology (IT) professional who specializes in analyzing, designing and implementing information systems. Systems analysts assess the suitability of information systems in terms of their intended outcomes and liaise with end users, software vendors and programmers in order to achieve these outcomes.

Systems analyst - Wikipedia

Systems analysis began as a mathematically rigorous, "rational" means of comparing the expected costs, benefits, and risks of alternative future systems – such as weapons systems – characterized by complex environments, large degrees of freedom, and considerable uncertainty. The word 'systems' indicates that every decision should be considered in as broad a context as necessary; the word 'analysis' emphasizes the need to reduce a complex problem to its component parts for better ...
