Programmable Logic Controllers 5E (W. Bolton).pdf

The input devices sense what is happening in the process, the controller

decides what to do about it, and the output devices manipulate the process to achieve the desired result. A programmable logic controller or PLC is a general-purpose controller, applicable to many different types of process control applications. The word “programmable” in its name reveals just why PLCs are so useful: the end-user is able to program, or instruct, the PLC to do virtually any control function imaginable.
