The future of NASA's space shuttle program

Nasas Space Shuttle Program Astronaut
The Space Shuttle program was formally launched on January 5, 1972, when President Nixon announced that NASA would proceed with the development of a reusable space shuttle system. The stated goals of "transforming the space frontier...into familiar territory, easily accessible for human endeavor" [7] was to be achieved by launching as many as 50 missions per year, with hopes of driving down per-mission costs.

Space Shuttle program - Wikipedia
This is a list of persons who served aboard Space Shuttle crews, arranged in chronological order by Space Shuttle missions. Abbreviations: PC = Payload Commander MSE = USAF Manned Spaceflight Engineer Mir = Launched to be part of the crew of the Mir Space Station ISS = Launched to be part of the crew of the International Space Station. Names of astronauts returning from the Mir or ISS on the Space Shuttle are shown in italics. They did not have specific crew roles, but are listed in the Payload

Why Did the Space Shuttle Program End?

Space Shuttle Program

Space Shuttle Program | NASA

The program succeeds NASA's involvement in the Soyuz program, upon which it was dependent to transport its astronauts to the ISS following the retirement of the Space Shuttle program in 2011. Each mission in the Commercial Crew Program will send up to four astronauts to the ISS aboard either a Crew Dragon or Starliner, with options for a fifth passenger being available to NASA.

NASA - Wikipedia

The term "astronaut" derives from the Greek words meaning "space sailor," and refers to all who have been launched as crew members aboard NASA spacecraft bound for orbit and beyond. The term "astronaut" has been maintained as the title for those selected to join the NASA corps of astronauts who make "space sailing" their career profession.
